次の計算をしなさい。ただし解答は仮分数のままでよい。

$$[1] \quad \frac{5}{6} + 5 = \frac{35}{6}$$

[2]
$$3 - \frac{5}{8} = \frac{19}{8}$$

[3]
$$2 + \frac{3}{7} = \frac{17}{7}$$

$$[4] \quad \frac{10}{q} \quad - \quad | \quad = \frac{1}{q}$$

$$[5] \quad \frac{8}{3} + 4 = \frac{20}{3}$$

[6]
$$3 - \frac{1}{5} = \frac{14}{5}$$

[7]
$$7 + \frac{1}{4} = \frac{29}{4}$$

[8]
$$\frac{q}{2} - 3 = \frac{3}{2}$$

$$[9] \quad \frac{7}{6} + 2 = \frac{19}{6}$$

[10]
$$8 - \frac{11}{2} = \frac{5}{2}$$
